Locations

Denver, CO

Biography

Diana Galofaro is a licensed structural engineer (NY, CO) with over 11 years of experience in structural investigation, design, construction, and historic preservation. She has worked across all project phases, from conceptual design to construction administration, and is skilled in evaluating steel, concrete, masonry, and timber structures dating from the 19th century to the present. Diana's forensic expertise includes structural condition assessments to determine the cause and extent of damage or deterioration, supporting both repair strategies and litigation.
