Locations

Charleston, WV
Huntington, WV
Columbus, OH

Biography

Brandon Dial is a structural engineer with over five years of experience in industrial structural steel and concrete design, wood and masonry design, industrial construction, and project management. He develops as-built models from 3D scanned environments or field measurements to determine existing structural capacities and create modification designs and procedures tailored to client needs.

His forensic engineering experience includes assessing structural damage and repairing residential and commercial structures impacted by vehicle collisions, lightning strikes, and construction defects.

Brandon also brings nine years of law enforcement experience, where he served as a shift supervisor and conducted forensic and accident investigations.
