Biography

Becky Johnson is a Senior Case Analyst with seven years of experience supporting the development of forensic life care plan reports. Becky synthesizes complex medical documentation into clear, data-driven frameworks that quantify an individual's future medical and non-medical needs.

She is a valued member of the Life Care Planning team at YA Group, contributing analytical expertise and operational support to ensure accuracy and consistency across case deliverables.

Her work includes reviewing medical records, organizing case data, and preparing structured summaries that inform life care planning recommendations. Becky also provides high-level administrative coordination, managing intake processes and facilitating communication between legal teams, medical experts, and internal analysts.

Earlier in her career, Becky supported legal and case-related operations through roles that strengthened her skills in documentation analysis, case management, and client support. She holds a Paralegal degree from Trident Technical College and remains committed to maintaining the highest standards of accuracy, clarity, and professional integrity within the life care planning field.
